

SUBSTANCE USE

Substance use disorders occur when the recurrent use of alcohol and/or drugs causes clinically and functionally significant impairment, such as health problems, disability, and failure to meet major responsibilities at work, school, or home. In families where alcohol or drugs are being abused, behavior is often unpredictable and communication is unclear. Children whose parents/caregivers are abusing substances could feel responsible for their addiction.

Common substance use disorders:

- Alcohol Use Disorder (AUD)
- Tobacco Use Disorder
- Cannabis Use Disorder
- Stimulant Use Disorder
- Hallucinogen Use Disorder
- Opioid Use Disorder
